NAUK EKONOMICZNYCH  
ADAM NIEDZIELSKI  
MINISTER ZDROWIA  
RZECZYPOSPOLITEJ POLSKIEJ

Dear Sirs:

My name is Hector Carvallo, and I am the first researcher in the world that proved the effectiveness of ivermectin early treatment and prophylaxis in the current pandemic (in vivo).

And that is not the ONLY treatment available; there are quite a few which are also effective, safe and affordable.

I have learnt with great concern that you are authorizing trials with experimental vaccines in children.

Since vaccines can't cut the chain of contagion; children are almost always asymptomatic; and vaccines have proved to cause very severe side effects in this population, there are five times more chances of being a victim of vaccines, instead of being a victim of covid, among children.

Your Country was invaded by Hitler.

So, you must be familiar with the names and methods of J. Mengele and J. Goebbels.

Obliging vulnerable populations to be part of experiments, and making the media convince the rest that it is OK, are methods you have suffered in flesh.

After the WW2, when your Country tried to speak and think by itself, you were crashed by Stalin and the soviets.

So, there is nothing I can teach you about vulnerability, lies, coercion and censorship, because you or your ancestors suffered all that.

Please, don't follow those hideous examples.

Yours truly.

A handwritten signature in black ink, appearing to read 'Hector Carvallo', with a large, stylized flourish at the end.

Hector Carvallo M.D.

Argentina
